

Crisp Packet Recycling Scheme

We are now going to be recycling crisp packets and other flexible plastics at school.

We can all help to cut single-use plastics going to landfill by recycling the crisp packets and other plastic wrappers we have with our packed lunches.

All you have to do is drop your empty crisp packet or other plastic wrappings in the cardboard boxes provided in the Lunch Hall.

These empty packets can then be turned into watering cans and benches and other useful items.

Crisp Facts

20 million packets of crisps are produced in the UK every day.

It takes 80 years for a crisp packet to decompose.
